

Eclipses and Phases of the Moon - Streaming

For single-projector theaters, up to 2k.

Our streaming video service, powered by Vimeo, streams full-dome video over your broadband internet connection in fisheye (1:1) and mirror dome (16:9 and 4:3). You can screen the show as often as you want until the streaming period expires. You are responsible for the projection equipment setup in your theater and the quality of your internet and network connections.
